

Thy-Rox:

Natural nutritional support for healthy thyroid function.

Of all the hormonal problems facing society today little is more common than an under active thyroid. It is estimated that as much as 30 percent or more of the population suffers from hypothyroidism or an under-active thyroid. Many tens of thousands are probably borderline and go undiagnosed. The result of this condition is increased body weight, difficulty losing weight, brittle, thin hair, dry skin, difficulty sleeping and many other annoying side effects. The natural ingredients in Thy Rox provide the raw materials, which have been clinically shown to assist the thyroid in performing its natural functions more effectively.

Excerpted from a lecture by K. Steven Whiting Ph.D., Director, Institute of Nutritional Science. Reproduced by permission.

According to the research of such nutritional authorities as Dr Broda Barnes, MD and Jonathan Wright, MD, millions of people, especially women, may be suffering from low thyroid function. Even those currently taking thyroid medication often are either not getting the right dose or their body's may not be able to properly utilize the medication as effectively. For millions of others, their clinical testing is not low enough to be given thyroid medication, even though they likely would benefit from it. The formula that we have developed is designed to be used by those who have been diagnosed with low thyroid function, whether they are currently taking medication or not. Designed to provide the raw materials the body needs to help establish a more normal thyroid function, this formula may be used to support any health building program.

Capsules per Container 30
Serving Size 2 Capsules
Amount per 2 capsule serving:	% Daily Value
Vitamin C (Ascorbic Acid)	100	mg	166%
Vitamin B-6 (Pyridoxine HCL)	10	mg	500%
